## **Arghevan Samavati**

### **The Iranian Government seized her medical diploma**

Arghevan Samavati was born in a poor and uneducated family. Her father name's is Faridoon Samavati and her mother's name is Aghdas Taskini. Her mother and father are the most famous con-artist in Iran.

The Iranian government arrested the head of medical school because he took bribes from student's family for better and passing grade. More than two dozen students lost their diploma and were expelled from the school.

She is not a doctor now and is married to a dental assistant and has one kid. Samavati Family has never had real educated members and those who graduated in USA have never used their degree because they did not earn it. We were used to call it the Gholabi (Peach) diploma.
